SUPPLEMENTARY INFORMATION:

I. Abstract

In accordance with the Executive Order 12862, the National Institute of Standards and Technology (NIST), a non-regulatory agency of the Department of Commerce, proposes to conduct both quantitative and qualitative data collections. The data collections will be designed to determine requirements and evaluate the usability and utility of NIST research for measurement and standardization work. These data collections efforts may include, but may not be limited to electronic methodologies, empirical studies, video and audio collections, interviews, and questionnaires. For example, data collection efforts may include the public safety communications survey and the smart home devices study. NIST will limit its inquiries to data collections that solicit strictly voluntary opinions or responses. NIST will not conduct individual data collections under this generic clearance that are mandatory, required, or regulated. The data collected will be used to guide NIST research.

II. Method of Collection

NIST will collect this information by electronic means, when possible, as well as by mail, fax, telephone and person-to-person interviews. If an information collection is conducted in person, NIST will provide the respondent with a paper copy of the collection instrument that displays the “public burden statement”, OMB Control # and current Expiration date.
